1. (Amended) Procedure to transmit information in connection with telephone answering service which is provided by a mobile answer device in a mobile telephone system comprising:

12/

that a calling subscriber is connected to the mobile answer device when a called subscriber can not be accessed;

that, when the called subscriber establishes a wireless connection to the mobile answer device to listen to recorded speech messages, a text message is transmitted in parallel to the called subscriber, which message contains the stored information.

A2

7. (Amended) Procedure as claimed in claim 1, wherein the text message is transmitted by means of a short text message service.

Please add new Claims 8-10 as follows:

587

8. (New) Procedure as claimed in claim 7, wherein the short text message service is an SMS (Short Message Service) or a USSD (Unrestricted Supplementary Services Data).

A3

9. (New) A method of transmitting information between a calling subscriber and a called subscriber in a mobile telephone system, comprising:

connecting a calling subscriber to a mobile answer device when a called subscriber cannot be reached; and

transmitting a text message when the called subscriber establishes a wireless connection to the mobile answer device to listen to recorded speech messages.

10. (New) The method as in claim 9, further comprising:

transmitting the text message as a SMS (Short Message Service) or as a USSD

(Unrestricted Supplementary Services Data). --
